John Smith

COMPUTER SYSTEM TECHNOLOGY STUDENT | AI & APPLICATION DEVELOPMENT
Saskatoon, Saskatchewan | john.smith@example.com (sample address)

PROFILE

Saskatchewan Polytechnic diploma student, expected to graduate in 2027. Developing practical skills in Python, introductory machine learning, retrieval-based AI, and application interfaces through credited, guided portfolio projects. Interested in junior roles involving API integration, testing, debugging, and clear documentation.

EDUCATION

Saskatchewan Polytechnic - Computer System Technology Diploma
2025-2027 | Expected graduation: 2027

Relevant learning themes: object-oriented programming, Java/Python, web fundamentals, SQL and relational design, debugging, and collaborative Git workflows.

TECHNICAL SKILLS

Project practice: Python, Streamlit, pandas, scikit-learn, LangChain, FAISS, LLM APIs, RAG, Git.
Coursework / introductory exposure: Java, JavaScript, TypeScript, C#, SQL, HTML/CSS, React, Tailwind CSS, FastAPI, Node.js/Express, ASP.NET Core, PostgreSQL.
Tools and foundations: Linux, pytest, Docker basics, Kubernetes fundamentals, Azure basics.

SELECTED PORTFOLIO PROJECTS

MultiPDF Study Assistant | August 2026

Guided Python/Streamlit implementation connecting PDF extraction, text chunks, embeddings, FAISS retrieval, and conversational context. Planned refinements emphasize source inspection and a small, documented evaluation set.

Source credit: Alejandro AO - original repository

LLM Chatbot | June 2026

Guided Streamlit API example with session-based conversation history and a credential check. Extension outline covers input validation, reset, retry behaviour, and repeatable failure-path checks.

Source credit: Streamlit - original repository

Penguin Prediction App | March 2026

Guided pandas/scikit-learn classification app with interactive inputs and probability display. Evaluation outline separates training, validation, and test data and explains input checks and model limitations.

Source credit: Data Professor - original repository

NEXT STEPS

Planned final-year capstones: Engineering Knowledge Assistant (Azure sample adaptation) and ML Classifier & Quality Pipeline (Made With ML adaptation). No professional certifications earned yet.
